

Installation Instructions:

MS-995 Maxilar Pipe Marker Installation

MS-995 coiled pipe markers are designed to wrap entirely around the circumference of a pipe and seal to themselves (not the pipe surface). Notice on one end of the marker is an adhesive sealing strip; it looks like a clear piece of tape about 1" wide with a paper liner covering the adhesive.

1

Using opposite end of the marker roll around circumference of pipe

2

Align edges and pull marker snug against the pipe

3

Bend paper liner in opposite direction from the adhesive

4

Pull off white paper liner

Installation Instructions: MS-995 Maxilar Pipe Marker Installation

5

Press adhesive strip and smooth it across the marker to seal it to itself

6

Ensure sealing strip is smooth, flat and free of wrinkles.
