

MS-995 STAINLESS STEEL CARRIER PIPE MARKERS

Technical Data

Description

MS- 995 Extreme Temperature Stainless Steel Pipe Markers consist of a laser engraved legend on a stainless steel carrier for mounting on pipes with surface temperatures ranging from -300°F to 500°F (-185° to 260°C). Stand-off brackets hold the marker away from the temperature extremes of the pipe’s surface. Special spacers prevent pipe surface temperature from affecting the engraved legend.

Laser engraving is permanent on the surface of the carrier which is then strapped to the pipe surface with Type 316 stainless steel brackets and banding.

Physical and Chemical Characteristics

Carrier Material:	0.060" (1.5mm) thick Stainless Steel
Legend:	Laser Engraved
Service Temperature Range:	-250°F to 500°F (-185°C to 260°C)
Corrosion Resistance:	Excellent
Expected Outdoor Durability:	5 Years
UV Resistance:	Excellent
Chemical Resistance:	Excellent
Storage Stability:	Indefinite when stored at room temperature with moderate humidity
Available Sizes:	2-3/4" x 18" (70 mm x 457 mm) 4-1/4" x 36" (114 mm x 914 mm)

Information on physical and chemical characteristics is based on tests we believe to be reliable. The values are intended only as a source of information and are given without guarantee and do not constitute a warranty. Purchasers should independently determine, prior to use, the suitability of this material for their specific application.
