

Marking Services Incorporated

PACK-BY BINDERS

Save time and labor by using the **MSI Pack-By Service** to **pre-sort** your labels.

Organizing labels on the job site can be difficult and lead to wasted time and money figuring out which labels need to go where. With Pack-By Binders, all of your labels will arrive in a binder that has been pre-sorted to your specifications prior to delivery.

Labels can be sorted by:

- Building
- Floor
- Room
- Label type
- Application

Your binder will arrive accurately labeled with the different criteria that your labels need to be sorted by. Available labels for packaging include:

- Wire Markers
- Circuit Labels
- Electrical ID
- Custom labels

Tabs show exactly where the labels should be applied.

Electrical labels can easily be peeled off of the sheets within the binder and installed to the proper location.

Binders are labeled by the specified sorting logic for easy storage and identification of application.
