

Stainless Steel Strapping

Technical Data

Description

Stainless Steel Strapping is used in conjunction with the stainless steel clips to create a strong, heat and corrosion resistant fastening system.

Physical and Chemical Characteristics

| Base Material: | Type 316 or Type 304 |
|----------------------|----------------------|
| Thickness: | .015″ |
| Width: | .375″ |
| Length: | 200 feet |
| Service Temperature: | -40°F through 350°F |
| Water Resistance: | Excellent |
| Outdoor Durability: | Excellent |
| UV Resistance: | Excellent |
| Tensile Strength: | 80,000 PSI |

Information on physical and chemical characteristics is based on tests we believe to be reliable. The values are intended only as a source of information and are given without guarantee and do not constitute a warranty. Purchasers should independently determine, prior to use, the suitability of this material for their specific application.
