Description

MS-900 UV Self-Adhesive Pipe Markers are specially designed for outdoor use. They are manufactured from premium grade thermoplastic with a permanent pressure sensitive adhesive. The film and graphics are laminated with UV Overlaminates providing not only additional chemical resistance but also excellent UV and fade resistance for extended outdoor durability. They are used to provide line service designations, system color-coding or various labeling needs. MS-900 UV markers conform to the ASME A 13.1 "Scheme for the Identification of Piping Systems" with regard to label colors, overall size and text height. Flow directional arrow tape or individual arrow markers are used with pipe markers to indicate direction of flow. MS-900 UV markers are available in a variety of standard and custom colors including clear.
